PROFESSIONAL SUMMARY

Computer Science and Engineering student graduating in 2027 with knowledge of Python, Flask, SQL, and web development. Familiar with building web applications using Flask, implementing CRUD operations, and working with databases. Good understanding of OOP, DBMS, data structures, and problem solving with an interest in developing practical software solutions.

TECHNICAL SKILLS

Languages: Python, SQL

Frameworks & Technologies: Flask , HTML5, CSS3, JavaScript

Database: MySQL, SQLite

Developer Tools: Git, GitHub

Core Concepts: OOP, DBMS, Data Structures

PROJECTS

Crop Disease Management Portal | Flask, SQLite, HTML, CSS, JavaScript

• Developed a Flask web application for crop disease identification using symptom-based user inputs.

• Implemented Flask routing, CRUD operations with SQLite database integration.

• Built responsive web interfaces to support disease-search and information workflows.

Road Damage & Repair Management Portal | Flask, SQLite, HTML, CSS, JavaScript

• Developed a web portal for submitting road-damage complaints and tracking repair status.

• Integrated Flask backend routes with an SQLite database for complaint-related data.

• Created responsive pages for complaint submission and repair-status tracking.

CERTIFICATIONS

• Python Programming Course – Dhaapps (2025)

• Web Development Virtual Internship – Pinnacle Labs (June 8, 2026 - July 8, 2026)

EDUCATION

B.Tech – Computer Science and Engineering

KU College of Engineering and Technology | 2023–2027

Intermediate – Alphores Junior College | Marks: 978

SSC – Tetra Hedron Model School | GPA: 10.0
